• <https://github.com/tushararpit9452-byte> • Pune, Maharashtra

PROFESSIONAL SUMMARY

Entry-level Data Analyst skilled in SQL, Python, Excel, and Power BI with hands-on experience in dashboard creation, business intelligence, and predictive analytics. Demonstrated ability to transform raw datasets into actionable insights across retail, consumer behavior, and healthcare domains. Seeking to contribute strong analytical and problem-solving abilities to a data-driven organization.

TOOLS & TECHNOLOGIES

Analytics	Excel (Adv.)	Power BI	SQL	Tableau*	ETL Pipelines*
Programming	Python	Pandas	NumPy	Matplotlib*	Scikit-learn*
Competencies	Data Modeling	KPI Reporting*	Dashboard Design	Predictive Analytics	Business Intelligence

* Currently learning

PROJECTS

FNP Sales Analysis & Dashboard Creation | Academic Project

2025

Tools: Excel, SQL

- Processed 10,000+ transaction records to analyze sales performance for Ferns N Petals (FNP) using Excel and Power BI.
- Built interactive Power BI dashboards to visualize revenue trends, top-selling products, and regional sales distribution.
- Identified seasonal demand patterns and recommended inventory adjustments projected to improve planning efficiency by ~20%.
- Applied advanced Excel functions — VLOOKUP, PivotTables, conditional formatting — for data cleaning and structuring.

Multichannel Consumer Purchasing Behavior Analysis | Academic Project

2026

Tools: Python (Pandas), SQL, Excel, Power BI

- Analyzed consumer purchasing behavior across online, offline, and hybrid channels using transactional and survey data.
- Performed data segmentation and cohort analysis with SQL and Python (Pandas) to surface cross-demographic behavioral trends.
- Created visualizations of customer journey touchpoints, conversion rates by channel, and cross-channel purchase frequency.
- Summarized findings in a KPI-driven report to support omnichannel retail strategy recommendations.

Risk Prediction Model — Healthcare Department | Academic Project

2026

Tools: Python, Pandas, Scikit-learn, Matplotlib, SQL, Excel

- Built a supervised ML classification model to predict patient health risk levels from clinical and demographic features.
- Preprocessed data including missing value imputation, categorical encoding, and feature scaling to optimize model inputs.
- Evaluated Logistic Regression and Decision Tree classifiers; achieved 80%+ accuracy with precision, recall, and F1-score reporting.
- Documented end-to-end pipeline and evaluation metrics in a structured analytical report mimicking a real-world healthcare use case.

ACHIEVEMENTS & ACTIVITIES

- Completed 3 end-to-end analytics projects spanning retail, consumer behavior, and healthcare domains.
- Built 3 analytics dashboards demonstrating proficiency in Power BI and Excel data visualization.
- Completed structured Data Analytics certification program (SQL, Excel, Power BI, Python) at Tutuude Pvt. Ltd.
- Actively expanding ML skills — currently implementing supervised and unsupervised models using Scikit-learn.
- Solved 100+ SQL practice problems across joins, CTEs, subqueries, and aggregation challenges.

EDUCATION

B.Tech in Computer Science | Maharishi University of Information and Technology, Lucknow U.P *June 2026*

- Relevant Coursework: Data Structures, DBMS, Statistics, Python Programming, Software Engineering.
- Applied academic knowledge through hands-on data analytics and machine learning capstone projects.

CERTIFICATIONS

Data Analytics Completion Certificate | Tutuude Pvt. Ltd. *2025*

- Covered SQL, Excel, Power BI, Python, and real-world project-based modules with business datasets.
- Gained practical experience in data wrangling, KPI reporting, dashboard development, and ETL concepts.
